

WR.032207
IMPLOSION IS THE KEY TO UNLIMITED POWER

I really can not grasp the level of your suffering, only to say my own mother was pushed by her grand daughter down the stairs several months ago and suffered a serious hip fracture.

Since this injury she has no longer been able to drive. It has been a lot of suffering on everyone in the family.

We bought our Carlson Sparrow from a de-certified pilot. He had to build an FAR 103 Ultra-light as close to his old Cessna as he could find. He found an all metal one based on a Luscomb, but they never filled his order. I also liked the Cappella and toured his factory. It had solid aluminum wings. It also "SHED" those wings when some pilots over stressed them doing acrobatic type stunts. For one this wing strut failure also plagued the Fisher, in its case it was a connecting joint.

Our favorite Ultra-light builder was "CHUCK BIRD" .Floyd xxxxxx told us to see him. He raised little dogs and had built dozens of Piper Cubs. He then began building his own high wing turtle deck planes using a Chaparral engine. They used push tubes for the ailerons. The Sparrow used wires.

The country is full of de-certified pilots, my father knows the father of an Oklahoma city aviation medical examiner.

There are old pilots and bold pilots.....but few old, bold pilots!

I know the F.A.A is our big brother and flight examiners protect us from unqualified pilots. I must remember that most pilots get killed in the first 300 hours. Experience still counts, everyone has a medical anomaly, we all have minor problems, the F.A.A can be very cruel in decertifying pilots as they did our Carlson Sparrow friend. Look at John Kennedy on his fatal flight in what was IFR weather conditions. I actually knew that was about to happen. Before I heard the news, I was walking on a long road down to the ocean surrounded by mountains with a tall man who looked like John F. Kennedy...I said to my self in this vision, why am I walking next to John F. Kennedy and the very same day his son and his wife and sister in law dies in that terrible water crash

I am very sorry your wife was in this accident, my friend and anthropologist Gordon xxxxxx was once caught between two cars on an icy road at UTEP.

Tragedy seems to follow me around these days, we saw several pilots die at Sportsman's in the brief time we were hangered there.

I hope your wife soon makes a complete recovery; after all she was trying to help someone else! I am hoping the car that injured her had insurance.

There are 12 million illegal aliens in America. They do not have valid drivers licenses or car insurance...It's a nightmare out there on those Houston roads! I drove them for years when I was going to college at HCC, Lamar University and HBU. It was all white knuckle driving on the loop!

To talk about even stranger things, I was in the ocean swimming when the first space shuttle exploded and remember vividly helping that poor school teacher into a life raft...The water was deep blue...I simply "KNEW" the first shuttle was going to explode. I could not get the feeling out of my mind...Then it did.

The one that broke up over Texas.I remember before I knew it had happened seeing all the astronauts in a green lawn covered place with nice straight streams everywhere. They looked alright. They also were not alive any longer.

On 9/11 I saw the terrorists in a hospital watching a program on surgery. They did not seem very interested and left the room. I could tell the after life they expected was not what they received. God does not kill people...HE SAVES THEM!

I have had many visions of the dead before calamities occurred.Like Cassandra I am doomed to know the future, but I can not prevent it!

Kim, you are not a Billionaire. I am not wealthy at all. Lack of funding has doomed so many of my science projects, it's pitiful.

In high school I attempted to build lasers and particle accelerators...I really was designing fusion reactors when I was 8 years old. At Grimes Elementary school I once asked a research scientist who brought a Van de Graff generator how important nuclear fusion was. They told me if I solved the problem I would be wealthier then every one in the room put together. I was about 7 then. It was 1965.

At T A&M there was book. I was 18 and it was in the late 70's. The book was large and hardbound yellow colored. It was written by Van de Graff himself about the PN-400!

This was a high pressure gas insulated "MINI ACCELERATOR"

I loved the PN-400...it was all I thought about at T A&M. It was 400 KV proton beam.In the book Van de Graff wrote it indicated you could use the PN-400 to initiate "FUSION". The experiment bombarded a Tritium target that then produced 11 MV neutrons on a counter to prove fusion had occurred.

I also toured the Van de Graff facility at Rice in my freshman year of high school.

Imagine how upset I was that a teenage boy in last months "POPULAR SCIENCE" was credited with building a fusion reactor...Photo is in the Popular science article about him...I WAS DOING THAT RESEARCH 20 YEARS BEFORE HE WAS EVEN BORN!

The experiment is in the PN-400 owners manual I studied at T A&M, he was not the first teenager to fuse hydrogen...HYPE HYPE HYPE!

The internet calls them "FUSORS" he is supposed to be the 10th teenager to build a cheap \$3500 dollar machine...WHOOPEE DO! He is using a 40 KV grid. That my friend is nothing! I was working at the Mega-volt level...using 1 to 2 meter Van de Graff generators 20 years before he was born. They act like they invented nuclear physics. NONSENSE...they are just babies playing with toys invented over 50 years before they were even born...COPY CATS! The PN-400 book proves it. The entire lab experiment for fusing hydrogen is in it using a PN-400. That book was written before 1978. I am not in possession of it. I am guessing it was radioactive. I relished that book as if it was my bible. Van de Graff was a great scientist. He also fused hydrogen 50 years before these internet babies were even born!

I have also looked at the "LIFTER" sight...I think it is cool. I also did those exact same experiments almost "40" years ago...BIG DEAL!

Kim, the world is full of people who claim they are the first at everything...I was doing most of their research before they had left their mothers wombs.

Look, our time on this Earth is drawing short

A doomsday rock is headed for Earth in 2029 followed by a "MEGA" doomsday rock a few years later...

Kim our military will protect itself from extinction

ITS THE REST OF US I AM WORRIED ABOUT.

We need to complete my research in implosion based convection generators....Its also critical to complete my "WORKING" not hyped Bessler wheel so that people would have a safe energy source if that doomsday rock shuts off our power grid.

Kim, I am working on the ASTRO-CLAM. There are two new designs. One uses two parallel plates with convex discs covering them and a piston at the center, it bounces endlessly when exposed to a heat source.

Please look up "THERMO-ACOUSTIC" engines on the net...They use steel wool and a piston (NO DISPLACER) . The steel wool is heated by a burner and glows red hot. The acoustic wave alternately heats and cools the chamber air which allows the piston to oscillate and generate power.

The other ASTRO-CLAM design uses a "BELLOWS" .The bellows covers a bottom hole that then blows air into it, this expands the bellows and opens the rim of the astro-clam which then evacuates and "RE-COMPRESSES" the bellows. This lifts the astro-clam into the air. The device uses rim vacuum against internal base hole pressure expansion in an endless cycle. It falls very slowly when dropped but is difficult to construct. Think of it as a new form of rotating parachute.

I also looked into Keely again and believe he used a simple resonator plate that had an upper "OVER HANG" like a finger nail. The base was fixed and compressed air was blown through the base and set the upper plate above it into resonance. This caused the single upper plate to "FLAP" like a humming bird wing generating hundreds of times the thrust a simple pressure source would. The point being, I can illustrate this very easily for you, Keely discovered "VORTEX" lift a hundred years before modern science unveiled it!!!

It works try it...my fear is that Keely on his airship hide a compressed air bottle. The resonators are easily demonstrated. If he used his compressed air efficiently enough, he could fly for several minutes. Kim I do not know what else Keely discovered, only that I have reproduced his resonator bars and they work..

Keely was a "MASTER" of compressed air transmission through "HOLLOW" wires...YOU CAN NOT TRUST ANYTHING HE DID...

All I am promising you is we can demonstrate his resonation bars...The rest of his ship is a mystery to me.

There was very good reason why his devices ceased to work when removed from his lab. Also, the largest things that can be suspended by acoustic energy are water drops and "ANTS"

A thousand pounds "FORGET IT"!!

He would have died from sound wave injuries just seconds after lift off. YES HE DID BUILD A WORKING AIR SHIP! Remember in his lab a propeller can be spun by compressed air reaction nozzles, no one would be the wiser...but only in his lab.I am convinced his resonator plates which I have reproduced generated fantastic lift with only a minimal amount of stored compressed air...He was a genius, but he was also a trickster! Did he discover the secret of anti-gravity???? Kim, lets be honest here, the secret died with him if he did or the military secretly reproduced his airship in 1896 and told everyone it was "WORTHLESS"!!! Either way we loose!

If you really want to lift large amounts of weight use the pyro-magnetic membrane. It works because as warm air cools it implodes with great force...

Kim, YOU DO NOT NEED A RESONATING MEMBRANE TO HEAT COLD AIR!!!! A rigid shell works far better

You only require a parallel plate membrane if you want to contract warm air in one of my designs.

FOR THE LAST TIME I AM TRYING TO WARN YOU AND EVERYONE ELSE WE HAVE MASTERED THE SCIENCE OF HEATING AIR INSIDE A TURBINE OR ROCKET ENGINE!

WE HAVE DONE NOTHING WITH THE PHYSICS OF CONTRACTING HEATED AIR IN A COLD EXTERNAL VORTEX TO PRODUCE POWER!!!!!!!!!!

KIM THE MILITARY KNOWS THAT **IMPLOSION IS THE KEY TO UNLIMITED POWER**, NOT COMBUSTION AND EXPANSION...They have tried liquid fuel and nuclear rocket engines, also resistance and ion based engines

But implosion is ignored....Kim if your working gas s "HOTTER" then the surrounding environment you "DO NOT NEED FUEL" ...all you require is at the center of a cold vortex....HUMANS ARE DUMB!, our little alien friends have used implosion for millions of years based on the research I have already showed you...JUST BELIEVE!

Schauberger knew this in the 30's and 40's

Kim, the military and our heads of government plan to survive those two doomsday rocks one 2029 and the "MEGA" rock following several yeas later.

If they cared about the civilian population of this planet they would share implosion technology with the general public before the rock hits in 2029 and the "MEGA" several years later...I only wish they cared about "OUR" survival.

My mission here to help mankind survive these calamities (SEARL FELT THE SAME WAY IN HIS VISIONS) has been a total waste of my time.

I will not allow The Lord to ever send me here again...Humans deserve what happens to them if they continue to ignore the prophecies of sincere men who seek only to save them, NOT MAKE MONEY! We do not believe in that where I come from.

I also had a vision about Carlos Migeul Allenda...He claimed to be a prophet of God...I still do not understand that dream. He brought all of the magnetic invisibility research to light...I tell you I had to look him up after the dream. I had forgotten all about him, but God didn't.

My last vision of al amazing things was Bill Shatner (captain Kirk) we were standing by a swimming pool (his wife drowned in their pool after a diving related neck injury...tragic).He approached me and said "WELL IF YOUR GOING TO BE RUDE", He then prepared to walk away. I said I did not want to disturb your train of thought. He then left a little blue boat floating in the pool and went away.

The subconscious mind is amazing! However the coincidence factor is beyond normal probability...time and time again God has shown me tragedies before they happened and the dead afterward...I do not know why....THEY WERE NOT DREAMS. They really happened. I like Bill Shatner. I just have been a round to many lawyers and prefer him in his role as Captain Kirk, not the funny Boston Legal he does now.

Kim, keep the faith...I really believe this does not end when we stop our physical existence...

I hope your wife recovers soon, Mr.Shatners wife was lost to him that night.

We all have mini strokes and osteoporosis after women reach menopause and men have low testosterone output as age increases. Women lose it all at once, men slowly over the years.

TAKE AT LEAST 2000 MILLIGRAMS OF CALCIUM WITH VITAMIN D, ALSO TAKE MAGNESIUM EVERY SINGLE DAY!!!!

You must do this your entire life...The best way to maintain bone density is to get one of my jumping staffs (the weighted spring piston and implosion tube) and hop around! It is a great way to have solid bones!

LOOK I HAVE DONE MANY THINGS YEARS BEFORE THESE PEOPLE HYPED IT UP ON THE INTERNET...I am an unsung hero who did not have the web to give away all of my discoveries on when I grew up in the 60's and 70's...Its too late to prove to anyone how long ago I was doing fusion research.

Kim, if I am right and that doomsday rock hits in 2029 and the "MEGA" several years later...we must prepare the "CIVILIAN" population with these power sources...They will help clean the atmosphere and keep people alive...They also can stop global warming by transporting waste heat into outer space. A large convection powered spacecraft will remove billions of watts of heat energy from the atmosphere the second they leave orbit.

Alas, I am not to be respected...It will be too late in another 22 years for the general population to build convection powered aircraft. The military received the airship secret from Keely in 1896 and kept it from all of us ,saying his machine was "USELESS" and over complicated...Lord God I wonder if they are lying or actually did ignore how strange 1000 pound anti-gravity airship, I think they studied it in secret and only told Americans it had no value. Searl also demonstrated his magnetic bearing UFO to the military...They know Kim, they know...

THE UNITED STATES MILITARY BETRAYS THE AMERICAN PEOPLE BY ONLY SAVING THEM SELVES USING IMPLOSION TECHNOLOGY. TECHNOLOGY THAT I HAVE TRIED ALONG WITH SCHUABERGER, SEARL AND OTHERS TO PROVE EXISTS.

I will see too it as a representative of the very God that protects America from all of its foreign enemies, that the selfish military and government officials that will survive these doomsday rocks will live in post apocalyptic hell they will wish they had died in...GREED KIM IS WHAT MY LORD HATES THE MOST. Feather your bed at the expense of others and we will see that it is full of rocks ...not feathers!!!

Lets hope the leaders and military scientists of this country share there implosion technology soon...when those dooms day rocks hit in 2029 and several years beyond when the "MEGA" is do, we will need non-nuclear atmospheric energy sources to survive.

That knowledge must not be only in the hands of the U.S. military!

If they survive this global destruction by constructing escape craft only a few chosen elite will fly in, they will reap the whirl winds of hell when they return to reclaim the Earth...NO it will not be allowed...The Lord acts in mysterious ways.

I have seen the Repulsine's in Germany...I told you I sent wave plate photos to Germano a long time ago...It is nothing new...The Repulsine can not now or ever be throttled...you need an electromagnet and spring loaded membrane that shuts off when no power is desired or it simply flies apart during implosion at 5 to 20 thousand RPM...**Copper is brittle and like the first jet engines in Germany WW 2 is only good for 1 to 25 hours of use before self destruction!!!**

STILL BE OF GOOD CHEER...you must be very positive about Schauberger now...there are people looking into his life's work all over the world...HE HAS NOT BEEN FORGOTTEN!!! I have but, that was Gods choice...not mine.

I think all of these people sending you information, the Mexican fellow and his magnetic vortex, the graphite fiber man in Africa are on the right track...they are doers not talkers...

OUR LORD WILL NOT FAIL US..WE ONLY HAVE TO REMEMBER IN THE END GOD WILL CALL THE SHOTS, NOT US...God will decide where and when to make this data international and meaningful to the general public when the time is right.

Kim my friend God bless....your stroke and fall was repeated all over my State as dozens of people we knew fell during that crazy storm. I knew a Dr. Ipock in Grove who fell, she is in her 70's and a world traveler who goes to help poor crises victims with medicine, even in Mexico and the Middle East. She laid on the frozen ground near her mail box for an hour before someone found her. I had no power for a week and had to walk through the devastation for days. The ice storm looked like a bad science fiction movie...Attack of the tree branch people!!! Tree branches crashed on to my roof for hours, including the side walk leading out of the front door just seconds after I was standing under it.

Cars are so dangerous. I wish we used cars under ground and left the surface for pedestrians! I pray to the Lord your wife will soon be completely recovered and am very shocked this happened. I knew something as wrong...

Kim, in the end we will all have to leave this world...I wanted it to be in an implosion powered UFO...if not then accept that only our Lord God decides when our time comes...I remember president Ford crossing just feet from me in Houston, I got a really great snapshot of him for my friend.

I also remember asking Dr.Carl Sagan about the "CYCLOPS" project at T A&M and Ralph Nader about the cost of solar cells at HBU, that was in the 80's

Sagan died of a blood disease.

Kim, there is a saying among my people I hold dear.....'HE THAT WOULD SAVE HIS OWN LIFE SHALL LOOSE IT, HE THAT SHALL SACRIFICE HIS LIFE FOR ANOTHER SHALL CERTAINLY SAVE IT!!!!'

I believe you and your wife are that kind of good people. One day the powerful elite in this country shall attempt to save there own lives at the expense of all the rest of us, who they have lied to about implosion energy.

Kim there is an Eternity out there believe me, trust me I have walked through it many times with the dead. Sometimes saving yourself is not as important as trying to save someone else...

ITS NOT THIS BRIEF LIFE YOU SHOULD BE WORRIED ABOUT ...ITS THE ETERNAL AFTERLIFE THAT MATTERS THE MOST ITS FOREVER NO THIS SMALL SPAN OF YEARS ON EARTH. DEATH MEANS NOTHING TO ME!

I ONLY REGRET BEFORE THE DAY I DIE I WILL NOT WIN AT LEAST ONE SMALL VICTORY FOR MANKIND!

Good luck my friend.. May the Lord keep you both.

P.S. as a word of warning to all of the would be fusion engineers out there on the internet playing around with fusion reactors...the grave yards from last century are full of people who experimented with x-rays....Thomas Edison's best assistant and close friend died of radiation burns from making X-ray photographs with un protected arms. Edison later said it was so horrible to watch his close friend die he would never go near x-ray equipment again...Madam Curie also died of radiation exposure induced leukemia....KIM IT IS NOT THAT I DO NOT UNDERSTAND NUCLEAR PHYSICS...THE LORD SIMPLY FORCED ME TO GO IN ANOTHER DIRECTION...THERE IS A GIANT FUSION REACTOR BEING BUILT IN FRANCE...I AM MORE INTERESTED IN SAFE ENERGY SOURCES THAT WILL NOT PRODUCE X-RAYS OR NEUTRONS, I HAVE STUDIED UNDER COUNTLESS PHD'S STARTING AT RICE IN MY FRESHMAN YEAR OF HIGH SCHOOL.THEY ALL TOLD ME JUST ONE THING...THIS REMINDS ME OF THE CHRISTMAS MOVIE WHERE EVERYONE TOLD THE LITTLE BOY WHO WANTED A RED RIDER BB GUN..."YOU WILL SHOOT YOUR EYE OUT KID"!!! KIM I WAS WORKING ON VAN DE GRAFF ACCELERATORS,FUSION, AIR CORE BETATRONS 20 YEARS BEFORE THERE WAS A WEB...AGAIN AND AGAIN MY PROFESSORS TOLD ME TO STOP DOING THOSE EXPERIMENTS...I DID AND THE LORD IN HIS WISDOM SHOWED MY A SAFER FORM OF ENERGY WITH ALMOST UNLIMITED POWER POTENTIAL...AS WELL AS SMALLER ONES LIKE THE BESSLER WHEEL POWERED FROM THE CONVECTION ENERGY FOUND IN ANY CLOSED SPACE....friend I know what all of these kids on the net want...They like lasers because they are "COOL" I helped build a CO2 laser in high school...vacuum pump and all. They like fusion reactors for the same reason...its "COOL" I'm the man...I have a fusion reactor...they are babies...they are playing with there own death!!! I had been there and done that before they were even born! I have had a lot of PHD's tell me to give it up. I listened, I am still alive...I also never blinded anyone for life with a laser, now you can order one from popular science with "NO" warning as to its hazard...ANY IDIOT CAN BUILD A LASER!...how many people do you know who can build a new human eye???????...expose your self to radiation and you can and will die a terrible death...Don't believe me??? look up an old Readers Digest article..."THE TALE OF THE RADIOACTIVE BOY SCOUT" it was written in the 90's about a boy who made his own Breeder reactor and "NUKED" his entire neighborhood...I AM NOT PREACHING. I just think that when you speak of nuclear energy so casually in your research it is a thing best left to large scale science, the training reactor I visited in my first semester at T A&M was leaking! I recall the lab director sticking his hand in the water and laughing...it was only later we found out it was faulty, to this day I wonder if he still has his hand...They are also irradiating ALL of our food now to give it a longer shelf life....I prefer simple thermal energy (COOKING) to nuclear isotopes being used to pre-sterilize my food...God save us from the awful greed of our nuclear power dominated world...they are "NUKE" happy...Lets please friend go in another direction...there is a safer convection based energy source equally as potent...I have discovered that energy source...THANK YOU KIM ...God protect you and your precious family...
